Palak Pandey

Software Developer | C/C++ · Java · Python · React · Next.js · SQL | Building full-stack apps and AI-powered tools | Open to SDE / Intern roles

Mumbai Metropolitan Region

Summary

I’m a final-year B.Tech IT student (AI/ML focus, CGPA 8.6/10) with a strong foundation in C, C++, Java and Python, and hands-on experience building with React, Next.js, TypeScript, Flask and PHP/MySQL. I enjoy problem solving: I’ve worked extensively on data structures, algorithms and competitive programming, and I care about writing efficient, maintainable code.What I’ve built Smart India Hackathon 2026: with a team of 6, built a Gen AI prototype that automates institutional request workflows (Next.js, TypeScript, Tailwind, Gemini API). It covers request classification, document extraction, SLA-tracked approval chains and role-based access with audit logs. Placed 3rd in the internal round. College Knowledge Assistant (RAG): PDF ingestion, chunking, ChromaDB embeddings and Llama 3.2 3B answering questions from retrieved context, with a Streamlit interface. Dhan Bank: a full-stack banking app (PHP, MySQL) with money transfers, balance updates, transaction history and server-side validation for invalid transfers. Multilingual Government Schemes Chatbot: a Flask API with intent detection over a JSON knowledge base, supporting English, Hindi and Marathi. Let’s Shyp: a 5-stage logistics booking flow in React and TypeScript with real-time price recalculation and state persistence.Tech stack: C · C++ · Java · Python · JavaScript · TypeScript · React · Next.js · Flask · REST APIs · Tailwind CSS · SQL / MySQL · Git & GitHubI also interned as a Data Analyst at HappieLoop, where I cleaned and analyzed 3,900+ customer records with Python, Pandas and SQL and built a Power BI dashboard. That gave me a habit of treating data as a product, not an afterthought.Outside code, I served as Joint PR Head of the CSI chapter at my college (200+ members), which taught me to collaborate and communicate across teams. Open to Software Engineer / SDE / Full-Stack roles. Reach me at palakpandey254@gmail.com.

Experience

Happieloop

Data analyst intern

July 2026 - August 2026 (2 months)

- Cleaned and preprocessed 3,900+ customer records with Python, Pandas and SQL, producing analysis-ready datasets.
- Wrote SQL queries and ran exploratory analysis on subscription status, age groups, product categories and retention patterns.
- Built a Power BI KPI dashboard that made customer segments and purchasing trends easy for the business to interpret.

Education

Pillai College of Engineering

Bachelor of Technology - BTech, Information Technology · (August 2023 - July 2027)
